Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/3/03 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Takemae, U.S. Patent 4,513,304.

Takemae shows the invention as claimed including in a method of manufacturing a semiconductor device provided with a gate electrode 16 and a diffusion layer for a drain line 15 and another diffusion layer for a source line 17 disposed adjacent to each of opposite end portions of said gate electrode 16, the method comprising the steps of: forming a conductive layer on a substrate through an insulation film 19; patterning said conductive layer to form said gate electrode 16 together with a shielding electrode 20,

wherein said shielding electrode 20 is formed as a continuous line disposed adjacent to each of opposite end portions of said gate electrode to extend in parallel with said gate electrode; injecting an impurity into said semiconductor substrate 10 in a self-aligned manner with the use of both said gate electrode and said shielding electrode as masks to form said diffusion layers covering adjacent ones of transistor cells; insulating said gate electrode in each of said transistor cells with an insulator 14, wherein said diffusion layers are of the same width and form diffusion source and drain lines of equal width extending, in a completed device, between adjacent memory cells since it is clear that the gate electrode and shielding electrodes are regularly spaced (see figs. 4A-4E and col. 5-line 30 to col. 6-line 26).

Allowable Subject Matter

Claims 1-9 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard A. Booth whose telephone number is 308-3446. The examiner can normally be reached on Monday-Thursday from 7:30-6:00.
